

Valorant RAG Handbook

Valorant Introduction

Valorant is a tactical first-person shooter developed by Riot Games. The game combines precise gunplay with agent abilities, creating a unique blend of strategy and mechanical skill. Two teams of five players compete over a series of rounds where attackers attempt to plant the Spike and defenders attempt to stop them.

Agent Roles

Agents are divided into Duelists, Controllers, Initiators, and Sentinels. Duelists specialize in creating space and taking fights. Controllers manipulate vision and territory. Initiators gather information and disrupt enemies. Sentinels focus on defense, information gathering, and site anchoring.

Popular Duelists

Jett is known for mobility and aggressive playmaking. Reyna excels at taking isolated fights and healing from kills. Phoenix uses fire-based abilities and can heal himself. Raze specializes in explosive damage and area denial. Yoru focuses on deception and teleportation.

Controllers

Brimstone provides smokes and orbital strikes. Omen uses shadow-based abilities and teleportation. Viper controls areas with toxic walls and clouds. Astra manipulates stars to create smokes, stuns, and gravity wells. Harbor uses water-based abilities to block vision.

Initiators

Sova gathers information using recon tools. Breach disrupts enemies with powerful crowd-control abilities. Skye combines information gathering with support utility. Fade tracks enemies using fear-themed abilities. Gekko commands creatures that provide utility and information.

Sentinels

Sage heals teammates and can resurrect allies. Cypher uses cameras and traps to gather information. Killjoy relies on automated defensive gadgets. Chamber combines sentinel utility with powerful weaponry. Deadlock specializes in restricting enemy movement.

Weapons

The Vandal deals high damage and can secure a one-shot headshot at any range. The Phantom offers a higher fire rate and quieter shots. The Operator is the premier sniper rifle. The Sheriff is a powerful sidearm capable of eliminating enemies with accurate headshots.

Economy System

Teams earn credits from round wins, kills, Spike plants, and loss bonuses. Economy management is a crucial skill. Teams often choose between full-buy rounds, force-buy rounds, eco rounds, and half-buy rounds depending on their resources.

Maps

Ascent features a large central area. Haven is unique for having three bomb sites. Bind includes one-way teleporters. Icebox emphasizes verticality. Lotus features rotating doors. Sunset introduces new tactical pathways and site approaches.

Competitive Ranking

Players progress through Iron, Bronze, Silver, Gold, Platinum, Diamond, Ascendant, Immortal, and Radiant. Radiant is reserved for the highest-performing players in a region.

Professional Esports

The Valorant Champions Tour (VCT) is the primary esports ecosystem. Major events include regional leagues, Masters tournaments, and Champions, the game's world championship event.

Strategy and Teamwork

Successful teams communicate enemy positions, coordinate utility usage, trade eliminations, and manage their economy. Decision-making and teamwork are often more important than raw aiming skill alone.
